### PROFILE

---

I am a passionate Flutter developer with 1.8 Years Of experience building cross-platform mobile applications. Skilled in designing and implementing responsive, user-friendly interfaces with efficient code. I enjoy solving challenges, learning new technologies, and delivering high-quality applications that meet user needs. Excited to grow further in the dynamic world of mobile app development.

### AREAS OF EXPERTISE

---

- Flutter
- State Management ( Getx and Bloc)
- Api Integration
- Flutter Favours (Android / IOS)
- FFMPEG
- Figma
- Flutter Version Control
- Sockets
- dart
- Firebase
- Responsive Design
- Github
- IDEs (Android Studio / Xcode)
- Postman
- Deep Linking

### PROFESSIONAL EXPERIENCE

---

#### Coddit64

Jr. Flutter Developer

2025/06 – Present  
Ahmedabad

- Currently developing a cross-platform mobile app (**iOS & Android**) in Flutter from the ground up.
- Converting Figma designs into responsive Flutter UI and integrating with **REST APIs (updating/changing endpoints as needed)**.
- Contributing to the ongoing development at Coddit64 to ensure a smooth and scalable product.

#### Moon Technolabs

Jr. Flutter Developer

2023/11 – 2025/05  
Ahmedabad

- Designed and delivered cross-platform Flutter apps (Android, iOS, Windows, Mac) with responsive, user-focused UI/UX.
- Optimized app performance by integrating REST APIs with pagination, dynamic data handling, and reduced API latency.
- Implemented Firebase services (Push Notifications, Crashlytics, Firestore) and complex authentication flows, including Apple Sign-In.
- Built advanced image/video editing features and streamlined state management using GetX and BLoC.

### PROJECTS

---

#### Moon Invoice

- The app should load a webview for a **URL** and manage the download functionality using **base64 data** provided when the download button is clicked. Additionally, it should support printing functionality by utilizing the provided **HTML data** and **PDF (base64)** when the print button is clicked.
- Implement social media logins, including **Google, Microsoft, Facebook**, and especially **Apple login (on Android as well)** using **Firestore authentication**.
- Set up flavors for both Android and iOS to accommodate four different URLs for the app. Dynamically configure the **bundle ID, URL, and logo** for each version. Additionally, create a **script** to facilitate building the app with a single command.
- Implement push notifications for both Android and iOS platforms using **Firestore Cloud Messaging (FCM)**. Configure FCM to send notifications from the server and handle them in the app, including **custom actions** and **background message handling**.

Cannabis Mobile Plus

Built a media-sharing app enabling users to upload and view reels, podcasts, and videos with seamless playback and an Instagram-style reels section for engaging content discovery.

- Worked on UI design to create an intuitive and visually appealing interface.
- Implemented API calls to fetch and manage media content efficiently.
- Developed the Reels section, handling user interactions and reel management on clicks.
- Designed the podcast player interface inspired by Spotify, including next and previous track management.
- Created a comment section that opens from the bottom like Instagram, enabling emoji sending and comment liking.
- Implemented content filtering using GetX state management for dynamic and responsive user experience.

Keicho Worker and Supervisor App

a job management app where supervisors create and assign jobs to workers, track job details, and manage attendance with an in/out system. The app also allows workers to request leaves and view notices related to job issues.

- Designed and implemented UI components with seamless API integration for smooth workflows.
- Built and managed job assignment, leave management, and ticketing systems for workers and supervisors.
- Enhanced data handling with filters, issue tracking, and improved user interactions.
- Delivered multiple UI improvements, bug fixes, and stability enhancements across the app.

Moon Games

- Developed a **dynamic game listing UI** and integrated **WebView** to **launch games within the app**.
- Used **GetX** for efficient **state management** and **navigation** across the **game flow**.
- Optimized **performance** and handled **loading states** to ensure a **smooth user experience**.

ShiftIt

this is a mobile app for doctors in California to manage hospital shifts. It lets doctors clock in/out and maintain certificates, licenses, and profile details.

- Developed the **Shiftit app** for doctors in California to manage hospital shifts.
- Built the complete **onboarding flow** for doctors to add certificates, licenses, skills, and work state details.
- Implemented UI to display the list of nearby available shifts (data handled by backend).
- Added **clock-in/clock-out** feature for doctors to record their working hours.
- Enabled smooth **profile update flow** as per compliance and hospital requirements.

EDUCATION

<b>Master of Science in Information Technology(MSc IT)</b> GLS UNIVERSITY CGPA - 7.15	2022 – 2024
<b>Bachelor of Science in Information Technology(BSc IT)</b> GLS UNIVERSITY CGPA - 7.60	2019 – 2022
<b>Higher Secondary School Certificate(12th)</b> D.P. High School Percentile Rank 93.50% (75.73)	2017 – 2019
<b>Secondary School Certificate(10th)</b> D.P. High School Percentile Rank 79.91%(62.5)	2016 – 2017
